BUILDER TOOLKIT

Mini PRD

A one-page product plan: problem, users, user stories with acceptance criteria, scope and success.

Use it: Before building anything bigger than a single screen, or before handing work to an agent or teammate.

Problem and users

Problem and goal

e.g. Parents miss game changes; one place shows the current schedule

Users

e.g. Member (parent), Admin (coach)

Success measure

e.g. 80% of parents check the app before game day

User stories and acceptance criteria

Story 1: As a ..., I want ..., so that ...

Done when (story 1)

e.g. Given ..., when ..., then ...

Story 2

Done when (story 2)

Story 3

Done when (story 3)

Boundaries

Out of scope for this version

Data stored, and who can see or change it

Open questions

Fill it in with AI

Interview me one question at a time to write a mini PRD for [idea]: problem and goal, users, 3 to 5 user stories with Given/When/Then acceptance criteria, out of scope, data and permissions, success measure and open questions. Then challenge it: what's missing, and what's too big for version one?
